Levnesovia is a genus of hadrosauroid dinosaur from the Late Cretaceous Bissekty Formation of Uzbekistan. It was related to the Neoceratopsia clade of hadrosauroids. It lived in a region known as Transoxiana and would have reached around two meters in length.

The Princeton Field Guide to Dinosaurs 2nd Edition

The Princeton Field Guide to Dinosaurs is a comprehensive guide to the known dinosaurs. It is a lavishly illustrated volume that covers the great Mesozoic animals that gave rise to the living dinosaurs, the birds. The second edition to his seminal 2010 work, The Princeton Field Guide To Dinosaurs second edition was just as thorough and detailed as the first, and behavior. The text remains relatively approachable to readers at least somewhat familiar to basic biological terms.

Gregory S. Paul

This lavishly illustrated volume is the first authoritative dinosaur book in the style of a field guide. World-renowned illustrator and paleontologist Gregory S. Paul presents thorough descriptions of more than 735 dinosaur species and features more than 600 color and black-and-white photographs, line drawings, and maps. The Princeton Field Guide to Dinosaurs includes an extensive bibliography, providing a valuable resource for students and professionals alike.
